

*As I pursue my college education, I plan on getting involved in different organizations and clubs, as well as studying abroad to expand on my experiences. My goals are to obtain my doctorate in pharmacy so that I can become a pharmacist in the future. I want to participate in STEM-related internships so that I can be exposed to different science programs. While being enrolled in Saint Louis University, I will be majoring in chemistry which is needed in the field of pharmacy. This scholarship will help me fund my education at SLU so that I don't have to deal with the financial barriers of paying for college. Specifically, this scholarship will help me cover enrollment fees, orientation fees, and housing fees. I am very appreciative of this scholarship and look forward to starting my college experience!*
